

RENTAL CLOSEOUT / BUILT WITH CALL-E

The job is finished. Is the rental?

OffHire follows up on existing equipment off-rent requests for contractors managing several suppliers. CALL-E verifies the exact asset, billing cutoff and reference, then keeps collection and invoice follow-through visible.

THE DISTINCTION THAT MATTERS

"Pickup is booked for tomorrow."

COLLECTION

Scheduled

BILLING CUTOFF

Still unconfirmed

Illustrative dialogue. Pickup and off-rent are distinct records; supplier terms vary. ^[1] ^[2]

From request to reviewable record.

01	02	03	04
Prepare	Call	Reconcile	Follow through
Enter one existing request. Confirm readiness and the approved contact.	Review the scope. CALL-E asks for the facts and reads them back.	Check supplier transcript turns. Keep uncertain results open.	Record pickup and written receipt. Check invoice dates; export evidence.

IMPLEMENTED IN THE MVP

Real CALL-E integration	Server-side SDK create/get calls, saved jobs and duplicate-submission controls.
Separate, supported outcomes	Asset/contract matching, transcript-linked receipts and later-correction checks.
Reviewable follow-through	Site updates, JSON evidence export and invoice end-date comparison.

THE COMMERCIAL HYPOTHESIS

A focused business.

A measurable pilot.

Target customer: a regional contractor or rental broker with several active sites, multiple suppliers and recurring missing off-rent confirmations.

PROPOSED PILOT PRICE

\$99 / month

+ CALL-E usage at cost

ILLUSTRATIVE TIME VALUE

\$160 / month

40 events x 8 min x 75% removed = 4 hours
4 hours x \$40/hour = \$160

All inputs are assumptions, not measured savings. The price is a test; no current CALL-E tariff is asserted.

Compete on completing the conversation.

United offers free online off-rent requests. ^[3] Equipbase already tracks requests and collection, with tailored pricing. ^[4] OffHire targets unresolved confirmations across suppliers: exact answers, evidence and a clear next action. Already confirmed requests should not need another call.

Two weeks to test the value.

BASELINE	Measure today's staff minutes and missing confirmations.
RUN	Use approved contacts; track completion, ambiguity and attempts.
COST	Measure minutes of calling, usage cost and staff time per closeout.
DECIDE	Check continued use and willingness to pay for a monthly plan.

SCOPE, STATED CLEARLY

The public demo uses synthetic rentals. Live calls require credentials, approved destinations and operator approval. OffHire verifies an existing request; it does not amend a contract or update a supplier ledger. Invoice differences are review flags. Customer adoption and financial savings remain unvalidated.
